

# **MISSION PERU BAPTIST INTERNATIONAL PROGRESSION CHECKLIST AND USING THE SYLLABI**

## **HOW THE LEARNING SHOULD WORK VIA MISSION PERU**

Due to the teaching material being on-line and being readily available to all interested students, we have designed a checklist to help each student pass through the necessary steps and have good success. Additionally, we will explain how to use the syllabi and class information for effective learning.

First, understand that the order and subject of teaching is critical to BI. A student should follow step by step and do things decently and in order.

Secondly, understand the materials provided are generally effective and have been used since the 1970's with success. However, the syllabi are not equal to the infallible word of God. The use of the syllabi is to direct study to the word of God.

In fact, if we were to simply supply a page of organized scripture references to study, a good teacher could easily walk a student through the biblical truths to be learned. But, because we are men, we tend to write things in long form with the hope that our words will better explain.

With this in mind, there is no "divine set" of syllabi outside the word of God. The syllabi will help the student to breakdown the thoughts he should understand, and the student should be diligent to study the passages of scriptures so he understands them well.

We have made the syllabi as comprehensive as possible, but that is not to say that all there is to know is in the syllabi. Each student should seek God for enlightenment and understanding as he studies. If the student has a good thought or some recommended additions to the syllabi, he should include these comments in his class summary that he emails to HBC.

## **BI STUDENT CHECKLIST – ASSOCIATE LEVEL**

To simplify the program, here are the things in order the student should do:

Go to Mission Peru and read the Introduction and Information files and the BI Manual in the section under BI.

Familiarize yourself with all the sections under BI. Read how the program functions, how credits are applied, and how the scripture work is evaluated.

Fill out the Student Application and send it to HBC at the email on the website page.

Make sure you have the materials as listed in the information.

Practical Training and Work Journal. Have a work Journal started. Record the student's regular schedule in the ministry, including regular preaching schedule and places, visitation, scripture distribution quantities and locations, scripture publication quantities and dates, other learning and preparations, memory verses, etc. The Work Journal is intended to be maintained throughout the course of study. Any questions should be directed through the email.

If he is already active in the ministry, he should describe in detail his ministry in written form. If still in training under the local church, the student should discuss with his pastor the areas of service that would be profitable. Any questions about the class should be directed through the email. Any questions about what a student should do in the ministry should be directed to his pastor. Memorize the verses indicated.

Although this is considered a class, it practically will be a discussion and a writing exercise. **IMPORTANT:** We at BI do not intend to insert ourselves between the servant and his pastor, not interfere with his calling of the Lord. This class is designed for the student to evaluate and identify his area of service for the Lord; and if not already in effect, for the student to seek his pastor's wisdom and counsel in the work God has called him to do. We know our Saviour wants every Christian active in service. This class provokes that consideration and discussion, and asks for a written description of what the student intends to do in the ministry. It is a description of the student's calling. We at BI ask for a copy of the written description so we can better know the student and be of better service.

Class # 012: Term Evaluation for Certification. Read through it carefully trying to understand what is written. Any questions should be directed through the email. Similar to the previous class, this class is mainly an evaluation and a discussion of the progress of the student.
